

Quality Policy

Thistle Fabrication is a fully integrated fabrication, repair and shutdown maintenance service supporting industry including power generation, oil & gas, chemical/process and mining organisations.

We are committed to implementing and maintaining a quality management system that meets the requirements of ISO 9001 (2015). To this end we shall maintain a quality system consisting of policies, procedures, and forms that are contained in electronic document.

All documents forming our quality management system will be controlled such that they must go through a review process prior to approval and issue.

Records produced as a result of our quality management system will be maintained and controlled to conform to any relevant legislation or statutory requirements. These records shall also form input to our management review process.

We shall maintain measures of our quality system performance through regular audits of policies, procedures and forms and documents produced as a result of using the quality management system. This validation shall ensure processes are achieving planned results and conforming to the requirements of ISO 9001. Where deficiencies in our quality management system are identified timely corrective action shall be taken to rectify the deficiency.

We encourage our employees to seek additional measures to provide continuous improvement in our quality management system.
