

**THISTLE**  
FABRICATION

## Quality Policy

Thistle Fabrication is a fully integrated fabrication, repair and shutdown maintenance service supporting industry including power generation, oil & gas, chemical/process, and mining organisations.

We are conveniently based in Kwinana, Western Australia offering ease of access for many of our customer base. We specialise in high quality work and our technical ability of intricate metallurgical requirements is second to none.

Thistle Fabrications Quality objectives include a commitment to:

- Continually improving the Integrated Management System
- Ensuring controlled documents are maintained including review, approval, and issue.
- Meeting all legal and other requirements
- Meeting or exceeding customer requirements and satisfaction
- Ensuring adequate resources for the quality system implementation
- Performing regular audits of the quality management system and addressing deficiencies with timely corrective and preventive action.

Thistle Fabrication has a fully integrated management system compliant to ISO 9001:2015.

Thistle Fabrication will consistently strive to increase staff awareness of quality matters and seek continuous improvement measures.

We identify key performance goals aligned to our Policy objectives as part of our annual safety and quality plan.
